CERTIFICATIONS

1. Masters Program - Simplilearn Certified in collaboration with IBM - 2025

- Business Analytics with Excel
- Programming Basics & Data Analytics with Python
- Data Science with Python
- Machine Learning Using Python
- AI (Deep Learning) Training
- Power BI
- Data Analyst Capstone
- AWS Solution Architect Associate.

2. Python Programming - IBM Cognitive Class - 2025

3. (ISC)² Certificate in Cybersecurity - 2023

4. OCA & OCP - Oracle 9i - 2010

EDUCATION

Post Graduate Diploma, IT Project Management

Welingkar Institute, Matunga, India 2023

B.E., Electronics & Telecommunications
Mumbai University,
2004

SKILLS & EXPERTISE

- **Analytics & Data Science:**
(Exploratory Data Analysis) EDA, Data Cleaning, Data Wrangling, SQL Development, Query Optimization Data Modeling, Feature Engineering, Statistical Analysis, Predictive Analytics
- **Machine Learning & Deep Learning:**
 - Classification, Regression, Clustering (K-Means)
 - Imbalance dataset technique (SMOTE, Class-weight), Cross-Validation, Hyperparameter Tuning
 - ANN, Neural Networks

TEJAS A VEDAK

PROFESSIONAL SUMMARY

Senior Data Analyst and Advanced Analytics professional with 17+ years of experience in SQL Server, Oracle PL/SQL, database design, performance tuning, ETL development, Python-based analytics, and machine learning solutions, Data Science Specialist, analytics, and applied machine learning in Banking, Retail, and Supply Chain domains. Specialized in predictive modelling, feature engineering, classification systems, and end-to-end ML lifecycle development, including model validation and deployment readiness. Proven ability to translate complex business problems into scalable, production-ready data solutions, mentor analysts, and drive data-driven decision-making for senior stakeholders. Skilled in translating business requirements into scalable data solutions, performing exploratory data analysis (EDA), and delivering actionable insights to drive strategic decisions.

WORK HISTORY

January 2011 - August 2025

Boardwalktech Solutions Pvt Ltd - Technology Lead | SQL Developer | Data Analytics Lead, Mumbai, India

- Led SQL development, data analysis, and application enhancements for enterprise clients, managing large datasets (10M+ records) and improving complex reporting workflows with performance increase by 40%.
- Collaborated with business stakeholders to translate requirements into scalable data solutions and actionable dashboards.
- Optimized complex SQL queries and database performance, reducing report generation time by 35-40% while maintaining 99.9% data accuracy.
- **Revitalized** a distressed project by implementing critical enhancements after performing a **root-cause analysis, stabilizing operations and driving an 18% increase in revenue**.
- Proven track record in **project recovery** and **turnaround management**, specifically in rehabilitating underperforming projects to achieve sustainable **revenue growth** through targeted enhancements.
- Designed the solution with **deployment considerations**, including containerization using Docker
- Led cross-functional data initiatives across Banking & Retail clients.
- Worked on Oracle PLSQL and SQL Server for projects with different clients like **Apple, Blue Buffalo, General Mills and performed data analysis for product enhancement**.
- Worked for SQL Performance Tuning, Query Optimization, Query Execution, Plans, CTE, Window Functions, Dynamic SQL, Temp Tables, Table Variables, Database Design, Normalization, Transaction Management, ACID Principles, Stored Procedures, Functions
- Performed ETL Processes using SSIS.

May 2010 - December 2010

Insolution Global Pvt Ltd - System Analyst

- Developed backend data processes for Card Management and reconciliation systems.
- Automated reports and validated data consistency to support business operations.
- Worked on Oracle PLSQL for report generation and database development for Card Management system.

June 2008 - May 2010

Freelancer - SQL Trainer

- Conducted SQL training for professionals covering Basic and Advanced SQL, focusing on query optimization and real-world use cases.

October 2006 - May 2008

Financial Software & Systems - Sr. Technical Associate

- Monitored ATM transactions using BASE-24 and generated operational reports using TACL and ENFORM.

August 2005 - May 2006

Akruti Technologies - Technical Assistant

- Assisted with technical operations, data processing, and reporting tasks.

- ROC-AUC, Precision-Recall Optimization
- **Tools & Visualization:** Power BI, Tableau, Excel, Jupyter Notebook,
- **Databases:** SQL Server (2014–2022), Oracle 9i–19c, BigQuery
- **Cloud:** AWS Solution Architect Associate, AWS Storage services like S3, EFS, EBS, Glue, Athena, RDS Compute Services:EC2, Lambda, Networking Services: VPC, Subnet, Internet Gateway, NAT Gateway, IAM
- **Programming:** Python (Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch, Matplotlib, Seaborn), SQL, PL/SQL
- **ETL & Development:** Stored Procedures, Triggers, Performance Tuning, SSIS
- Docker (Model Packaging), Production-Oriented ML Workflows
- Version Control: Git, GitHub
- **Other:** SDLC, Requirement Analysis, Technical Documentation

DATA ANALYSIS & ML PROJECTS:

1. Insurance Data Analysis (Data Analyst Project) [Client: Accenture]

Tools: Python, Pandas, Matplotlib, SQL

- Performed EDA on insurance datasets to support pricing, risk assessment, and customer segmentation.
- Cleaned and transformed raw data, identified trends, and generated visualizations to provide actionable insights for underwriting strategies.

2. General Mills Sales Analysis & Forecasting [Client: BlueBuffalo (General Mills)]

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed state-wise Q4 revenue analysis to inform expansion and targeted sales strategies.
- Carried out data wrangling, visualization, and analysis to identify high- and low-performing states, providing recommendations to stakeholders.
- ML model development and train models and tests on test data, adding the module in existing product for further analysis.

3. Employee Turnover Analytics using Machine Learning [Internal Boardwalk Project]

- Built an end-to-end machine learning solution to predict employee attrition, identifying at-risk employees to support HR proactively for retention strategies.
- Performed in-depth EDA and K-Means clustering to uncover key attrition drivers and segment employees into distinct behavioral groups. Trained and evaluated Logistic Regression, Random Forest, and Gradient Boosting models with SMOTE and 5-fold cross-validation, prioritizing Recall to minimize high-cost attrition misses.
- Selected and fine-tuned a Random Forest model with threshold optimization, delivering risk-based employee classification (Safe to High Risk) for improved workforce planning

4. Loan Default Prediction using Deep Learning [Client: CITI Bank]

Tools: Python, Pandas, NumPy, Scikit-Learn, TensorFlow, Karas, Docker

- Built an end-to-end Deep Learning classification model to predict loan default risk.
- Performed data preprocessing, feature scaling, encoding, and class imbalance handling using SMOTE. Designed Artificial Neural Network (ANN) with Dropout and Early Stopping to prevent overfitting.
- Achieved 71% Accuracy and improved Recall for high-risk defaulters. Evaluated using Confusion Matrix, Precision-Recall, ROC-AUC. Containerized application using Docker for scalable deployment.

Other Boardwalk Projects:

- **Title:** Velocity [Client: CITI Bank]
Summary: Velocity Tool Development -used for EUC (End -User-Computing) export to database.
- **Title:** Order Management System [Client: Accenture]
Summary: Developed Application tool for stock and order management.
- **Title:** Product Development for forecasting and generation of reports
Client: Blue buffalo (General Mills)
Summary: Lead and coordinate with team for Designing & development of server-side objects and troubleshooting of production issues & resolution.
- **Title:** Boardwalk Product migration from SQL Server to ORACLE (11g) server
Client: Apple
Summary: Developed Customized 7 processes and Automated Periodic Shift processes used for forecasting in Supply Chain Management.
- **Title:** Accenture Change Request Management Tool [Client: Accenture]
Summary: Database developed for CRM.

Also worked on short projects as

Title: Asset Management [Client: Price Water housing (PWC)]

Title: Promotional Planning Process [Client: Coca-Cola Kroger Group]

Title: Purging Inactive data from database [Client: Levis Strauss]

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Marathi.
- **Soft Skills:** Time Management, Leadership, Team Coordination, Critical Thinking, Problem-Solving, Quick Learner, Adaptability, Strategic Planning.
